100%

Of all UAE curricula implementing our
cross & co-curriculum framework

Since 2019, The Ministry of Education has taken a significant step in this direction by partnering with IRENA to develop a cross-curriculum framework. This framework covers all 23 curricula within the country for all age groups, ensuring that students at all levels are exposed to sustainable development concepts. In 2023 the Ministry of Education is developing a framework and guidebooks, in alignment with the cross-curriculum framework, to guide the creation of sustainability focused co-curriculum activities for different levels of educational institutions in U.A.E.

100%

Of all UAE Schools having a master-educators able to train all teachers

The Ministry of Education of UAE has partnered with UNICEF and OCE to develop a comprehensive training plan that covers all principals and at least one teacher (Master Trainer) per school. Master-Trainers will have the mission and responsibility to train all the teachers remaining. The training plan also includes the Educator Voice and Children Voice initiative, which aims to empower educators and children to play an active role in addressing environmental challenges.

GREENING COMMUNITIES

07

Greening community guidelines and abstract models

The Ministry of Education, in partnership with UNESCO and the University Task Force, is developing a School and University Engagement model to promote sustainability in communities. Under this model, each emirate will have its own unique approach to engage schools and universities in promoting sustainable development.

... While MOE is paving the way to establish and sustain the first Education Pavilion in all COPs History ...

13

Days of
activations

In Partnership with UNESCO, The Education Pavilion will provide a base of operations for educating and inspiring the World about the Green Education Partnership. Acting as an international Platform, the facility will be the center to learn how the MOE has come to tackle Climate Change Actions and what measures we can take to ensure its essential place in the ecosystem.

Education Pavilion's four key objectives

1

Leaving a legacy of Climate Change infrastructure and future-oriented sustainable practices in Arabic and English (COP 29 and beyond).

2

Catalyzing Climate Change efforts in the UAE, the Region and the World by capitalizing on our impacts and achievements.

3

Increasing public awareness by engaging stakeholders on Climate Change principles by facilitating their implementation.

4

Developing and Showcasing Climate Change solutions that are scalable and extending to everyone benefits.
